Dear friends,

Time flies and can't believe that half year has just passed. In this issue, we make a hot-sale list to show you hot-selling Ninestar color toner cartridges, trying to present a real market trend from a different angle. Furthermore, Jarek Yang, the inkjet product manager of Ninestar, is invited to talk about the developing trend of business inkjet printers and help you to learn more about the industry.

We also unveil a new packing solution to save transportation cost for our customers. Check to know more details.

Enjoy reading issue!

Ninestar Hot-Sale Color Toner Cartridges in First Two Quarters

First half year of 2016 has passed. Lots of Ninestar products have been sold worldwide and won a good reputation from customers. What kinds of Ninestar color toner cartridges are popular in the market? Why made them popular and trusted by customers? Next, we're going to make an inventory of some hot-sale Ninestar color toner cartridges during past half year and unveil the details for you.

● Ninestar 201/360/410/530/540 series color toner cartridges for use with HP printers

Unique structure designs and personalized adjustments of components such as blades and springs contribute to color restoration and make the color close to OEM. Standardized production with over 50% machine-aided operation ensures stable quality. Those series Ninestar color toner cartridges have almost zero functional defects such as leakage, vertical lines and sealing problems. The series products can satisfy the customers who have high demands of color and printing performance.

● **Ninestar 404/406 series color toner cartridges for use with Samsung printers**

Equipped with Apex's replacement chips which claim to be a "global first-to-market" replacement chips solution", Ninestar 404/406 series color toner cartridges have a head start. Chips with patented electric conduction mode have comparable function with OEM, effectively improving poor electric conduction, non-recognition and other unstable printing problems caused by chips. You won't miss the products if you have high demands of patent and quality.

● **Ninestar 221/225 series color toner cartridges for use with Brother printers**

Equipped with imported American toner which shows good quality and outstanding color restoration, Ninestar 221/225 series products ensure stable and exquisite printing performance. Patented developing roller was self-independently designed to perfectly fit materials and components. Common defects such as vertical white lines and color deviation can be effectively avoided. This series is suitable for customers who have requirements for printing quality and stability.

● **Ninestar 210 series color toner cartridges for use with brother printers**

Equipped with patented design-around solution related to locking mechanism and detection gear, Ninestar 210 series are protected by our patented technology.

● **Ninestar 336/339 series color toner cartridges for use with brother printers**

With vivid color, stable quality and cost effectiveness, this series is still popular among worldwide customers after two-year sales.

More Ninestar hot-sale color toner cartridges are not mentioned in this article. As one of the leading manufacturers for compatible printing consumables, Ninestar devotes to providing quality products and service. Its products enjoy good reputation in domestic and foreign markets. For further information or cooperation intention, please contact our sales representatives!

Developing Trend of Canon Business Inkjet Printers

Jarek Yang, Inkjet Product Manager

As we all know that most offices use laser printers. However, more and more enterprises consider choosing business inkjet printers due to its rapid development with obvious printing advantages. What's the developing trend of business inkjet printers? Jarek Yang, the product manager of inkjet products, is invited to talk about this issue.

2007, HP released business inkjet printers that equipped with Scalable Printing Technology (SPT), which enables inkjet products to satisfy the high demands of business printing. In 2010, Epson's American company announced the launch of two powerful color business inkjet printers B-310N and B-510DN. Both aimed at business groups and small-sized enterprises by offering high-capacity color printing with excellent and reliable performance. In the meantime, Epson vigorously promoted Workforce series business inkjet printers that cover from entry-level to high-end products. Uncompromisingly, in 2014, Canon launched MAXIFY series printers as its business inkjet printing product lines. In 2016, HP released another business inkjet printer with PageWide technology. All manufacturers' movements segment the inkjet printing market and change the concept that "Inkjet printing is not for business". It's believed that major manufacturers will reposition their inkjet products lines and lead inkjet printing into business area.

We will take a close look at Canon MAXIFY series Inkjet Business Printers.

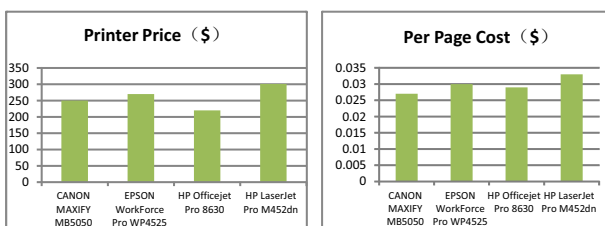

Canon named its brand new inkjet business printers as MAXIFY, which was highly promoted in 9 global regions with wide scope and strong power. The MAXIFY series employed pigment ink that not only have outstanding color fastness but also marker and friction resistant, making it perfect for high quality business documents. After two years, Canon introduced another 5 inkjet business printers to its MAXIFY series in Europe. We could anticipate from this action that there will be an obvious and strong growth of Canon inkjet business products in the future.

Canon MAXIFY Entry-level printers can be divided into two series:

Consumable No.	Printer Model	Page Yield
PGI-1500XL series	Canon MAXIFY MB2050/2150	BK:1200/C:1020/M:780/Y:935
PGI-2500XL series	Canon MAXIFY MB5050/5350/IB4050	BK:2500/C:1755/M:1295/Y:1520

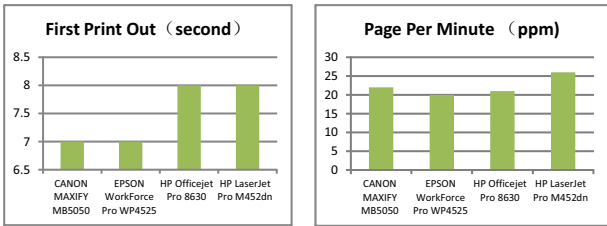

The emergence of inkjet business printers are not only for gaining more market share. Moreover, it is a breakthrough product to help customers work with unprecedented printing experience at a low cost.

Now, let us have a detailed comparison of Canon MAXIFY MB5050 (hereinafter referred to as Canon MAXIFY), Epson WorkForce Pro WP4525 (hereinafter referred to as Epson WorkForce), HP OfficeJet Pro 8630 (hereinafter referred to as HP OfficeJet) and HP LaserJet Pro M452dn (hereinafter referred to as HP LaserJet). All of them targeted at same customers groups even though HP LaserJet is laser printers.

(Data comes from OEM's official websites)

We can clearly know from Printer Price chart that Canon MAXIFY has a moderate price. As to Per Page Cost, Canon MAXIFY has obvious advantages in cost effectiveness.

(Data comes from OEM's official websites)

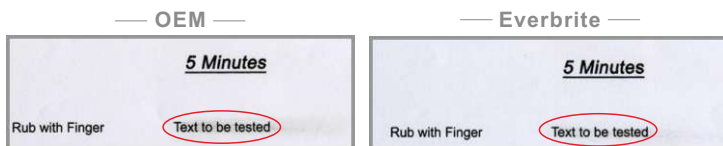

From above charts, we can see that Canon MAXIFY is taking a leading position in First-Print-Out time. Its PPM performed better than its previous products and other two inkjet business printers.

Considering the huge advantages and popularity of Canon MAXIFY series printers, Ninestar developed its patented alternative consumables, and the products are well received by the market.

● Advantages of Ninestar products

1. Equipped with EVERBRITE high-end pigment ink, to make Ninestar products better in printing performance, rub-resistance, water-proof and scratch-resistance.
2. Products are developed under safe solution with patented structures.
3. Strong R&D team to offer quality products.

● Rub Resistance Testing :

Everbrite exhibits superior rub resistance as good as the OEM after 5 minutes on plain paper.

● IPrinting Performance Testing

Everbrite's outstanding printing performance is comparable to OEM.

(* Above tests were under the same testing environment and tested by Ninestar.)

Ninestar Releases Cost-Saving Packing Solution

As a customer-oriented company, Ninestar released a new packing solution to help customer to save more transportation costs. So far, this new solution has been gradually applied in Ninestar 435/505/2612 series toner cartridges for use with HP printers. By optimizing the size and design of the package, the new packing solution can increase the loading capacity in each pallet. Transportation costs will be reduced accordingly.

Item	OEM Brand	Ninestar Model	OEM Model	Box Volume(cm ³)		Carton Volume(cm ³)		40HQ Loading Qty (With Pallets)			40HQ Loading Qty (Without Pallets)		
				Old	New	Old	New	Old	New	Increase	Old	New	Increase
Toner Cartridge	HP	NT-PH435C	CB435A/CRG712/ CRG312	3872	2932.65	68742	50641.5	11700	15855	36%	14280	19740	37%
	HP	NT-PH505C	CE505A/CRG119/ CRG719/CRG519/ CRG319	5280	4394.25	61841	50407.5	8400	11340	35%	10920	11620	6%
	HP	NT-PH2612	Q2612A/CRG303/ CRG703	3872	3175.2	68742	55204.8	11700	14700	26%	14280	18120	27%

*Detailed information of the new package VS old package

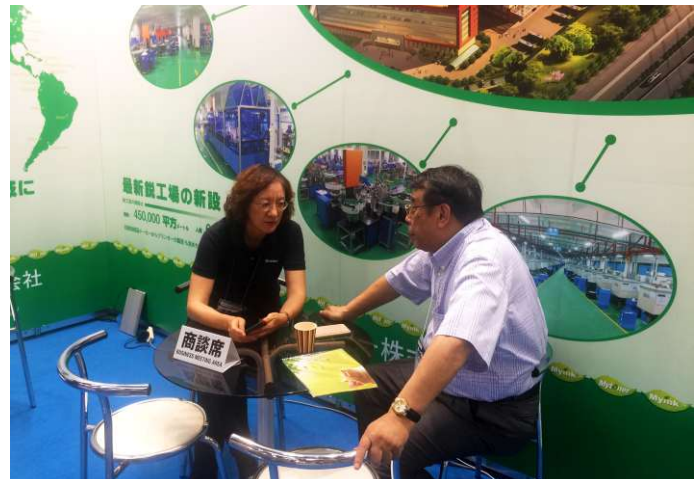

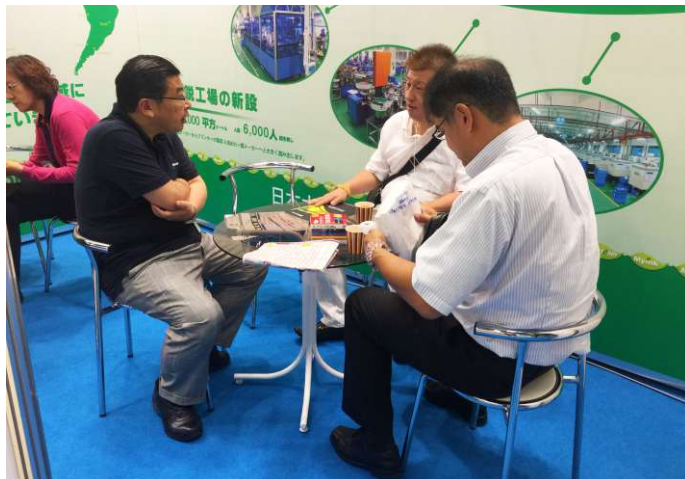

Take Ninestar 435 series toner cartridges as a good example. Before optimization, 540 boxes of products can be loaded in one pallet. After optimization, 735 boxes can be effectively loaded in one pallet.

It's believed that this new cost-saving packing solution will be gradually applied in Ninestar toner cartridges and inkjet cartridges. Now our engineers are working hard for it. For further information, please contact sales representatives.

Review of Ninestar's Exhibition at Japan

July 6th to 8th, Ninestar participated in 27th International Stationery & Office Products Fair in Tokyo Big Sight along with latest products and technology.

During two-days Expo, many customers were attracted to Ninestar's booth. Besides consolidating cooperation with existing customers, Ninestar showed various printing solutions to satisfy different demands. After detailed communication, most of the local customers expressed their recognition of Ninestar products and cooperation intention.

New printer concept revealed

A German designer has invented a new kind of printer that challenges old standards.

The new concept printer, called "Paper," is a 3-in-1 printer, copier and scanner that connects to your PC and mobile phone. So what is different?

It's cute! It would be very attractive for mobile workers and small offices and homes.

Instead of relying on a stack of paper, it uses a continuous spool of paper at one end. Copying and scanning can be easy too with this new concept. You can open its side, put the document in and simply choose to make a copy or scan it to mobile devices such as smartphones.

The inventor, Ludwig Rensch, has also made it bright orange, making it even more eye-catching and has provided a handle to make it convenient to carry around.

However, you cannot buy one—not yet! "Paper" is still in its concept stage. You can watch how it works at <https://vimeo.com/158807091>.

Global Printer Supplies Market to Top \$33 Billion

Driven by increasing demand for inkjet and wireless printers, the global printer supplies market is predicted to reach a market value of more than US\$33 billion by 2020.

So says market research company techavio. The research reveals that the OEM segment dominated the market with more than 82% market share in terms of revenue in 2015. Due to factors such as customers' perceptions that OEM supplies are reliable, durable and of high quality, the OEM segment will continue to lead the market for many years to come.

Geographically speaking, the Americas continue to lead the print supplies market, holding a 38% share of the global market in 2015. Thanks to the ongoing demand for inkjet printers and color laser printers in the region, particularly in U.S., the Americas made significant contribution to the global market revenue. Wireless printers in Americas also demonstrated high demands due to rapid technological advancements and increasing demand from corporates and educational institutes.

The research also analyzed the landscape of the global printer supplies market, noting the presence of several well-diversified players intensified competition in the market. Currently, key vendors in this market include (in alphabetical order) Brother, Canon, HP, Epson, Kyocera, Lexmark, and Ricoh.

Techavio's research findings may be considered to be at odds with that of others who see the total value of the industry being significantly more than \$33 billion, and possibly as much as \$80 billion. Others also state the OEM share of the consumables market is higher than 90% in color, and as low as 75% in monochrome, with a total share just over 20%.
